Training Services

Scholarships for occupational training Free Tuition up to \$10,000 for Short Term Trainings

Or up to \$3,000 per semester for Associate Level Degree.

Training must be in a high demand industry or occupation.

Training Services

Scholarships also cover non-tuition related costs such as:

- **Technology needs** – laptop, license fees
- **Transportation** – to and from training or to and from employment
- **Rent and/or Utilities Certification test and related costs**
- **Childcare while in training**

In some cases, customers may be paid weekly stipends for satisfactory attendance and/or participation in classroom activities

What are Targeted Occupations?

Workforce Solutions Capital Area regularly analyzes the regional labor market, looking for industry and occupational trends.

Based on this analysis, we have identified **In-Demand Industries** (like healthcare, skilled trades/advanced manufacturing and information technology), **In-Demand Occupations** (such as administrative and retail roles) and **Targeted Occupations**.

Targeted Occupations:

- Are in demand or emerging in the local economy
- Are experiencing growth, and
- Provide opportunities for high-skill, high-wage jobs

Training Services

High Demand Industry Sectors

- Healthcare
- Information Technology
- Skilled Trades
- Manufacturing

Ask us for a list of which trainings are available!

Additional Training Services

- On-the-job training
- Registered Apprenticeship
- Skills upgrading and retraining
- Disaster Relief Temporary Employment (DRTE)
 - Placement in a job where **WFS covers 100% of the wages**
 - Ask us for a list of position available!

In some cases, customers may be paid weekly stipends for full attendance of class participation

- POINT OF CONTACT THROUGH THE WHOLE PROCESS

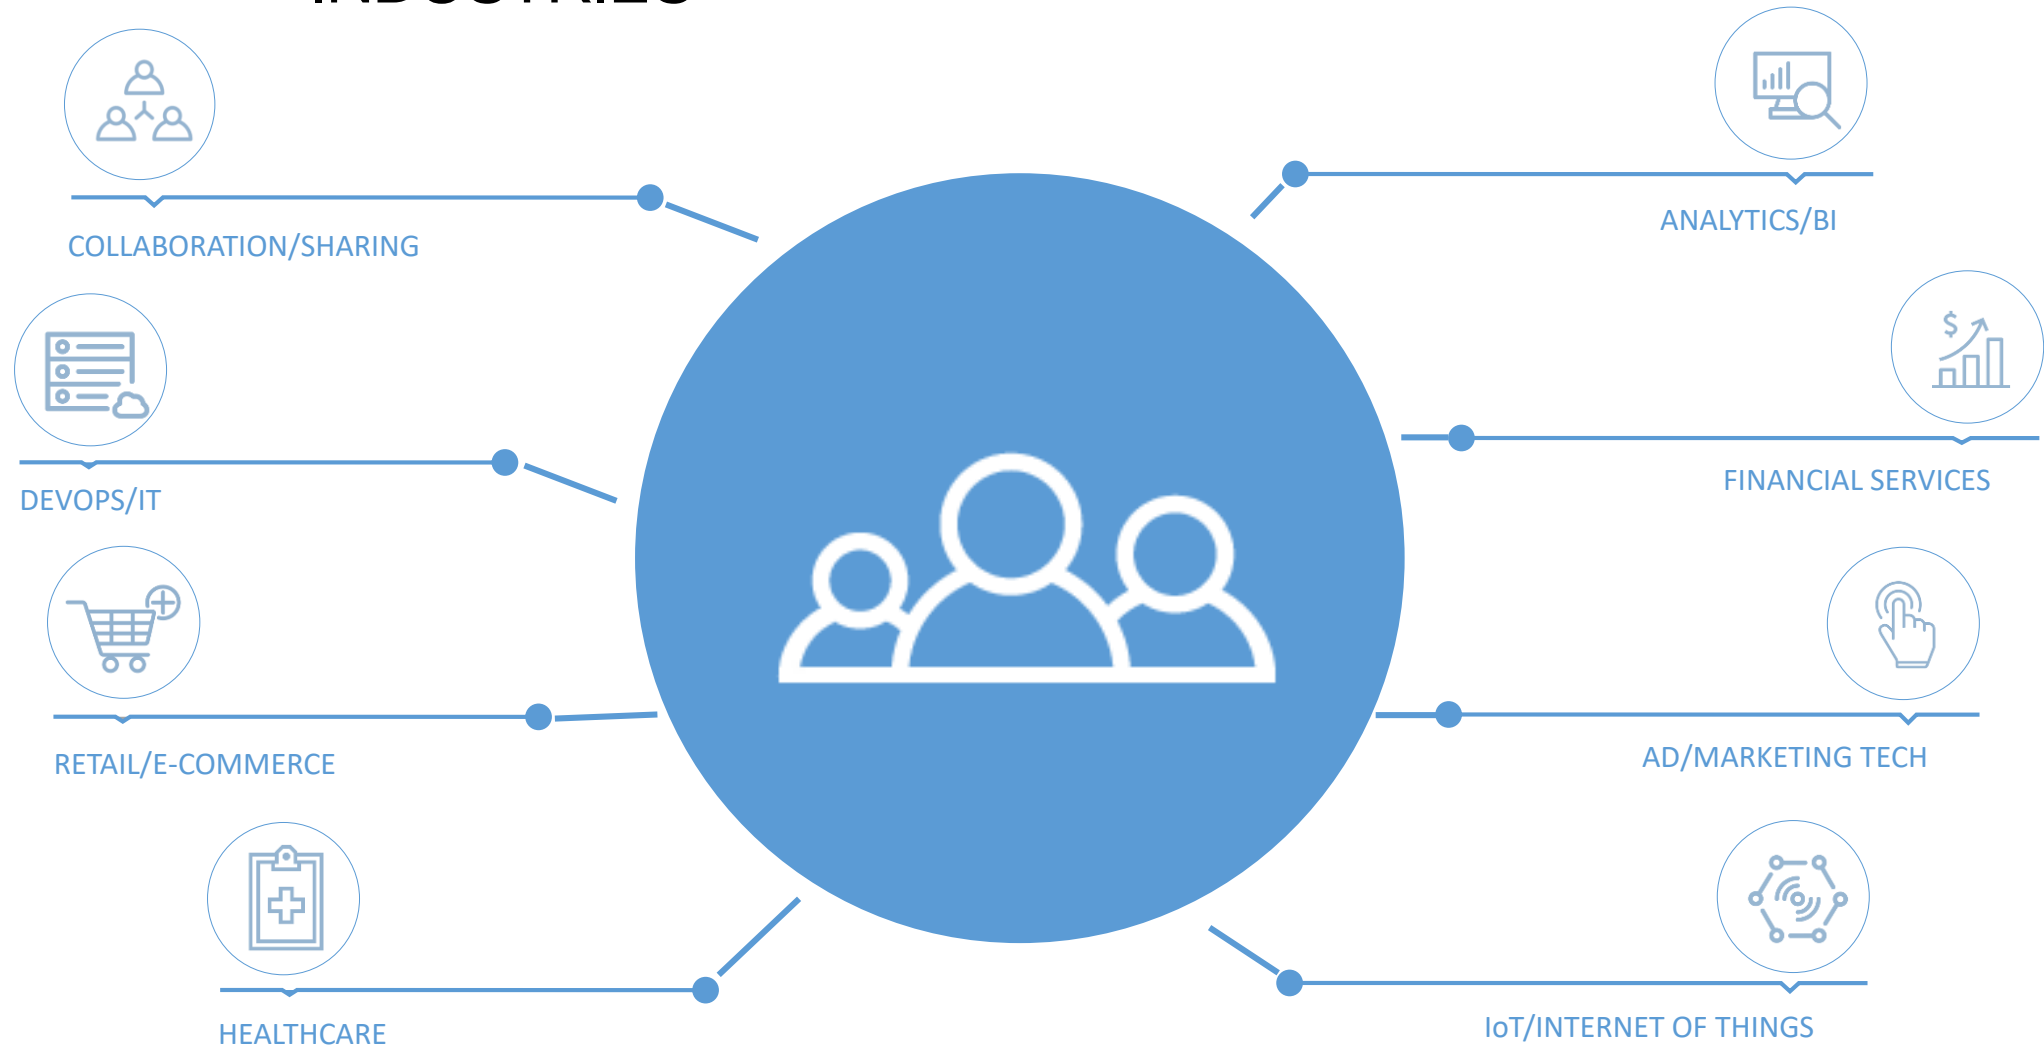

A group of diverse business professionals are gathered around a glass wall in a modern office setting. A woman with dark, wavy hair, wearing a blue patterned blazer, is pointing her right hand towards the glass wall. She is smiling and looking at the wall. Behind her, a man with dark hair and a black jacket is looking in the same direction. To the right, an older man with grey hair and a light blue shirt with a dark tie is looking at the woman. In the foreground on the right, a man with a full beard and a light blue shirt is partially visible. The background features a wall with horizontal wooden slats and a glass partition. The overall atmosphere is professional and collaborative.

CSR Manager, IBM

IBM Apprenticeship Program

Building 21st Century Skills

New Collar Programs

We're reorienting the US labor market and our organization's talent model to put **skills first**.

The New Collar team focuses on building new pathways and improving access to opportunities for people that come from non-traditional backgrounds and are historically overlooked; that can be someone without a 4 year degree, or someone who has been out of the workforce for a few years.

Apprenticeship

Registered apprenticeships are a proven approach for preparing workers for jobs while meeting the needs of a business for a highly skilled workforce.

IBM's industry-leading apprentice program is a new talent pipeline for IBM -- and we've been growing rapidly since our launch in 2017.

Tech Re-Entry

Returnship program for experienced technologists re-entering the workforce following a career break. Re-Entry hires participate in ~6-month returnship program to refresh skills and prepare for transition to full time opportunities. The experience provides personalized technical learning to update and gain additional skills; earning badges and credentials along the way.

P-TECH Model

Public education reform model focused on college attainment and career readiness.

IBM's P-TECH model enables students, from primarily underserved backgrounds, to earn both a high school diploma and a no-cost associate degree in a STEM field within a six-year period.

P-TECH students are paired with an IBM mentor, participate in workplace learning, and are eligible for paid internships

Neurodiversity

IBM has recently launched a global Neurodiversity program, focusing mainly on neurodivergent-friendly hiring, training and career development.

IBM Apprentice Program – The Basics

2017

year registered with the United States Department of Labor

27

registered roles, including Software Engineer, Project Manager, Mainframe Administrator, Data Scientist, and UX Designer

17

states where apprentices are currently working:
AZ, CA, CO, CT, GA, IA, IL, LA, MA, MD, MO, MN, NC, NY, TX, VA, WV

12 - 24

months of apprenticeship, though the competency-based design allows apprentices to progress at their own pace

200+

hours of learning completed by each apprentice per year

Apprenticeship DOL Registration

The IBM Apprenticeship Program is officially registered with the US Department of Labor (DOL).

Why is this important? Registering our program and roles with the DOL demonstrates IBM's commitment to setting the benchmark for the entire industry. It holds us accountable in ensuring we are providing a consistent framework and approach to competency and skill development through on-the-job training and learning.

Upon completion of a Registered Apprenticeship program, participant will receive an industry issued, nationally recognized credential that certifies occupational proficiency, is portable, and can provide a pathway to employment.

This registration also allows us to take advantage of the program "perks," which includes the eligibility to utilize various funding channels to subsidize costs for things like training.

Benefits for IBM

- Allows IBM to evaluate performance and obtain a comprehensive view of the apprentice's capabilities and ultimate potential
- Provides diverse perspectives to IBM on our tools, processes, and strategy
- Strengthens our community relationships to build high-caliber local talent and improves skills profile in local economy

Benefits for the apprentice

- Experiences a variety of roles to form a better opinion of areas of interest
- Builds confidence in handling challenging environments and supporting clients
- Gains valuable technical and business skills to be marketable both internally and externally
- Applies knowledge in a real-world environment

Apprenticeship Components

Mentorship

- Dedicated and invested in the success of the apprentice, uses framework and projects to provide continuous, real-time feedback

Competency Framework

- Setting a clear picture, of skill attainment and what success looks like, mutually agreed upon from the beginning

Learning

- Integrates self-paced learning with practical application on the job

Mentors Play a Critical Role

- Engaged mentors who are excited about the chance to develop apprentices are key.
- Mentors engage, guide, and support apprentices in their on-the-job training and learning journeys and determine if a competency has been achieved.
- Mentoring apprentices might include:
 - ✓ Providing on-the job training opportunities
 - ✓ Coaching apprentices to attain role-based competencies
 - ✓ Serving as a “Culture Coach” by helping apprentices navigate the team, site, and company culture
 - ✓ Helping apprentices set learning and career goals
 - ✓ Providing regular feedback on their progress
 - ✓ Meeting and communicating with apprentices daily
 - ✓ Answering their questions
 - ✓ Reporting progress and performance updates to the apprentice’s manager
 - ✓ Determining apprenticeship completion and graduation

Competency Framework

- Apprenticeships are designed as **competency-based** programs.
- Apprenticeship competencies and work processes are defined in the role "**Framework**" and are curated by Business Unit Subject Matter Experts. The Framework is a standards document submitted to and approved by the DOL and serves as the competency "roadmap" for managers, mentors and apprentices.
- Apprentices are required to achieve all competencies as outlined by the Competency Frameworks.
- In addition to competencies outlined in the frameworks, teams can elect to deliver supplemental training as needed by the business unit.

In Apprenticeship, we hire for aptitude and knowledge.
We teach the the skills required to do the job.
We give experiences to increase success in the role.

Training Journeys

On-the-job Learning (OJL)

As part of the design process, we work with SME's to develop a learning journey to help develop the apprentices' skills. The learning journey will include:

- Digital Learning
- Lunch and Learns
- Capstone Projects

On-the-job Training (OJT)

On-the-job training allows the apprentice to apply learned skills in order to master the required competencies.

We have created an agile program that will give managers the flexibility to curate an on-the-job training journey that best fits the business needs.

Current Apprentice-able Roles

Data Science

- Data Scientist
- Junior Data Analyst

Design

- Visual Designer
- User Experience Designer
- Design Researcher

Manufacturing and Testing

- Mainframe System Verification Tester
- System Support Technician
