

TECH TALENT VIDEO SERIES

OVERVIEW

Workforce Solutions Capital Area is interested in interviewing you to spotlight your journey as a tech employee in the Austin region. Your experience is unique, and sharing your story will help job seekers understand the opportunities and pathways into tech, and help tech employers in our region see an example of success and return-on-investment when hiring for skills as well as education.

OUR ASK

Workforce Solutions would like permission from your employer to schedule a date/time on-site to film a video interview with you. Please see this [video](#) for another success story we interviewed with HID Global.

If you and your employer are on board, please let us know a good time in late June or early July to schedule a time to visit.

Workforce Solutions will provide a copy of the finished product to your employer and encourage them to use this as a resource to promote their brand across our workforce ecosystem and social networks.

Workforce Solutions will provide the equipment needed for high-quality recording. You just need to bring your best selves.
